

Test with your own forms

**HYBRIDFORMS®**  
Mobile Business Forms & Workflow

# Be safe: Pilot Project

## Test drive your individual applications

Use the **1 free Test Account**, the **2 Scoping Workshop** and a **3 Pilot Project** (PoC, Proof of Concept, real-life test) or a pilot to test the mobile application of your business processes using HybridForms in your real-life environment – with your own tailor-made forms and, optionally, integrated into your systems.

### 1 Test Account with many ready-made forms

We set up HybridForms for you and activate **access for one user**. You test the mobile usability with several ready-made forms – close to your application scenario.

This way you can take the advantage of advanced features such as PDF, server data synchronization and biometric signature in **real life use**.

### 2 Scoping Workshop and your project plan

In the analysis workshop we support you, starting from your existing (paper-based) processes. We look at your procedures and requirements in detail – and yield our many years of **expertise from many other customer projects**. Together, we analyze your different use cases and business processes for specific and **meaningful digital feasibility** with HybridForms.

Data sources and information flows as well as needed system **interfaces** are examined, in addition to the requirements and real-life applicability from the point of view of your team – as well as suitable **mobile devices**.

## The following questions will be answered in the workshop:

- ✓ Which **current problem areas** can be **improved immediately using a digital solution** and in which steps can they be solved?
- ✓ Which existing **risks can be reduced systematically**?
- ✓ Which **positive effects** can be achieved regarding **saving** unnecessary activities and costs as well as **improving quality**?
- ✓ How **time-consuming** is the change process or implementation? What are the **costs** and how quickly will this **digital transformation** pay for itself?
- ✓ **Your benefit: Realistic planning for your mobile business processes, digital feasibility & economic efficiency gains.**

## Testing without project risk

You just need mobile devices, but **no licenses, and neither special servers at your site** nor any IT installations.

### Test Account: free of charge

#### Included are:

- » Setup of your user account as well as a free test license for 14 day
- » Apps for iOS, Android, Windows & Web and HybridForms Designer (offline)

### Scoping Workshop: € 1,560 or FOR FREE \*

\* When contracting Extended Pilot Pack

#### Included are:

- » **Workshop setup** with preliminary coordination (web conference) and comprehensive preparation with references
- » **Execution** of the workshop with 1–2 consultants from icomedias and your key decision makers for the duration of 3–4 hours **at your company site** (optional travel expenses)
- » Follow-up incl. written summary of the results

### 3 Pilot Project – Test Server & Your Real Forms

The Real-life Test is evaluating the essential functions in practice. You select from your existing (paper) forms and then, **together with our usability experts**, we create your individual form templates. **Our team will assist with concept, design and digital implementation.**

We'll set up HybridForms for you and activate **access for several users**. Your staff can work with your own in-house forms and use advanced features like PDF, data sync, group access, images with annotations and biometric signatures under **real life conditions**.

A Real-life Test runs for **several weeks**. During this period, you can verify how well HybridForms meets the requirements of your processes – and especially the **daily added value** for your users. All this is **accompanied by your directly responsible project manager** as a personal contact at icomedias.

- ✓ **Your benefit: No-fuss start, you don't need any internal IT servers, because servers by icomedias or Microsoft Azure Cloud are used. You just need to provide mobile devices for your team.**

#### Base Package € 4,950

- » Project setup, setup of your accounts for **standard users and administrator**
- » **Flexible 20-hr-pool** for **training and support for data import/export**
- » Setup **area with demo form** as well as **HybridForms Designer**

#### Extended Package € 9,950 ✓

- » **All Base Package services as flexible 50-hr-pool (total)** for
- » Concept development, usability design and production of **1–2 form processes**
- » **Extended training** for administration and technical form development

### Pilot Project & Services

#### Included are:

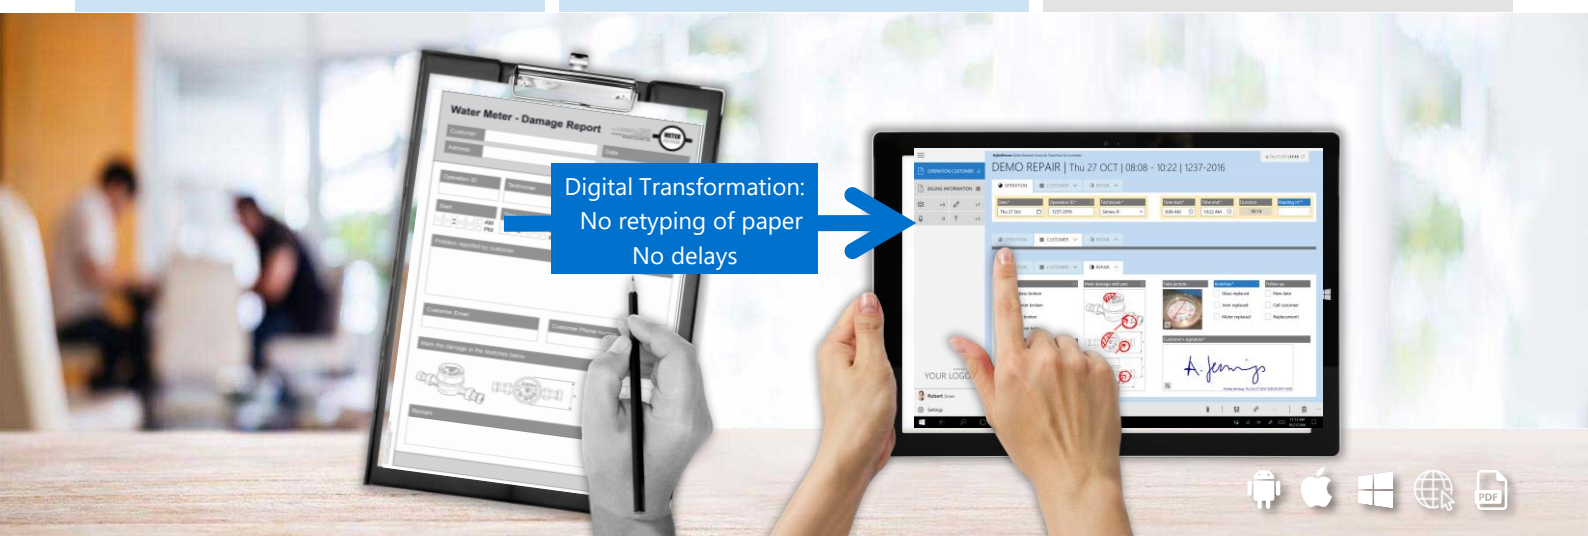

- » Setup of your Pilot as System on **HybridForms Server Operator Edition**
- » Servers at icomedias or Microsoft Azure Cloud. **Advantage: You do not need any servers at your site.**
- » Project setup, setup of your access for up to **5 users and 1 administrator** for the system as well as for HybridForms Designer for prototype forms
- » **Total operation** as well as licenses & server system for **60 days**
- » Server and **admin training**

The basic package includes services worth € 6,950 and a € 2,000 discount by icomedias for servers, operations and licenses as well as services. icomedias may name the customer with logo and project title (without details).

#### + Flexible Pools à € 1,650

Extended support is available on demand. For example, for **additional form processes, interfaces, or installation** on your servers using 10-hr-pools.

**Sustainable:** This saves time and reduces costs and risks in a follow-up project.

### Benefit from the security and sustainability of a Real-life Test

- ✓ **Safe preliminary project:** Results from a PoC go directly into planning for your production project and reduce risks. Your assumptions can be pre-tested, and errors avoided.
- ✓ **No purchase risk:** You can test without having to purchase licenses.
- ✓ **No need for internal IT infrastructure:** The PoC runs at icomedias (EU) or with Microsoft Azure Cloud, meaning your in-house IT does not need to provide internal servers.
- ✓ **Real-world conditions:** You can test all components in your daily working environment – from devices, handling, to system interfaces and data exchange.
- ✓ **Sustainable pilot services as the usability design of forms or interfaces can be used in a follow-on productive project and reduce costs.**
