

HYBRIDFORMS®

Enterprise Mobile Data Processing

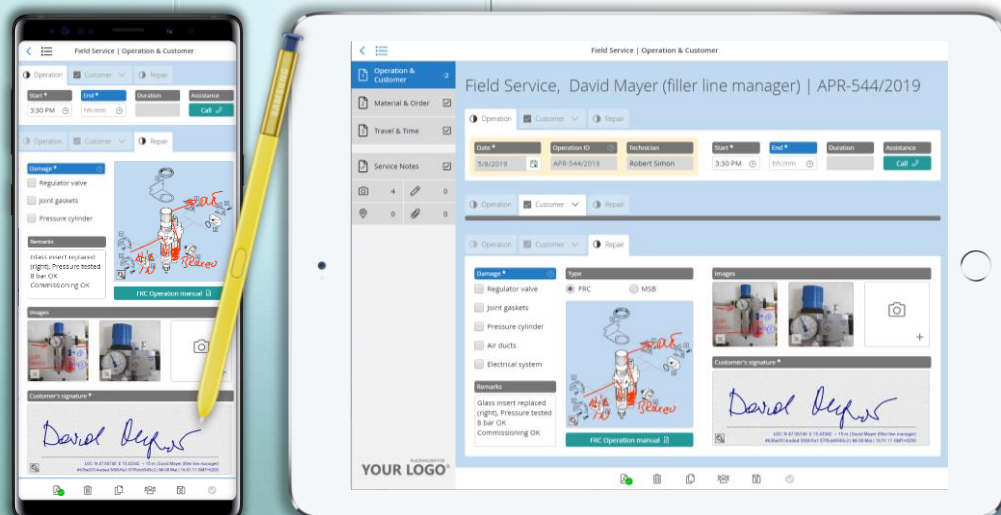

Mobile & digital Forms Processes

HybridForms is the mobile extension for your existing applications. For distributed teams in field service, service and back office.

- ✓ Dynamic checklists, operation documentation, maintenance protocols, acceptance reports, quality controls, audits
- ✓ Secure Enterprise features, Enterprise security, data exchange and interfaces to third-party systems
- ✓ Future-proof technology with rapid Return on Investment (ROI) and significant increase in efficiency

Mobile forms and checklists with HybridForms

HybridForms is the universal Enterprise Suite for mobile form workflows and structured data capture for distributed teams. Dynamic forms, built-in intelligence and integrated process functions accelerate and improve collaboration – even across divisions.

Improved data security and reduced risks

Maximum security through integration of your user rights systems (AD/ADFAS/AzureAD) as well as end-to-end encryption of the data transmission. Only offline data is on the end device. Successfully used by customers such as police, critical infrastructure and healthcare.

Data from third-party systems for pre-populated checklists

Assigned to an entire team or to individual users, synchronized to all mobile devices and completed online or offline. Sign in handwriting with an electronic pen. All data and updates are constantly and quickly transferred to the server – without delay.

Faster processes, reduced risks and better data quality

- ✓ **Minimized risks:** No outdated or lost forms – only complete and compliant data – less liability risks.
- ✓ **Higher productivity:** Less paperwork and more time for your core tasks & more business using automation.
- ✓ **Better data quality:** Completely digital with smart assistance and data validation to avoid errors and queries.
- ✓ **Fewer customer complaints:** Complete forms interactively with the customer, sign and immediately send a copy.
- ✓ **Improved results:** Flexible mobile working for more power for your field service teams and more happy customers.
- ✓ **Rapid amortization:** Gain ROI within months through universal applications, scalability & no process delays.

> Service | Field Service

All sales & customer data offline at hand – fully connected to your ERP & CRM systems.

> Manufacturing | Assignments

Track and monitor all tasks and status at any time – for teams even with shift status.

> Facility | CRITIS | Energy

Full access anywhere to plans, defects and all records of previous defects and maintenance.

> Healthcare | Government

Record, scan and sign all case details & data and seamlessly synchronize with the electronic files.

> Police | Public Safety

Record mobile operations & incidents completely and securely with photos, sketches, audio, geo data.

> Quality | Processes

Document Quality Management systematically and comprehensibly – even offline.

Enterprise features and security with HybridForms:

Reliable and secure collaboration for your teams.

Become successfully paperless!

HybridForms Apps

Mobile Client Apps for iOS, Android, Windows and Web – also cross-platform

HybridForms Server

Secure central data platform with Microsoft SQL Server or SQL Azure

Interfaces

Data exchange with existing systems like SAP, ERP, CRM, BI, Jira ...

Offline functionality

- ✓ **Seamless switching** between offline & online operation
- ✓ **Automatic synchronization** of data at network availability
- ✓ **Uninterrupted work** even at slow or no network

Biometric secure signature

- ✓ **Handwritten signatures** with pen directly at the tablet
- ✓ **Storage of biometric properties** according to ISO 19794-7
- ✓ **DSGVO compliant encryption** of biometrics directly on the device

Best mobile usability & UX

Intuitive use of App, optimized for mobile working on site

Images & sketches

Photos via internal camera or upload, sketch & annotate images

Scanning instead of typing

- ✓ **Read data from barcodes, QR codes** etc. directly into forms
- ✓ **Scanning of texts** with integrated OCR function
- ✓ **Up to 20x faster than** manual input & fewer sources of error

Multi device and OS

- ✓ **Mobile Client Apps** for iOS, Android and Windows
- ✓ **Web App (PWA)** for desktop devices and legacy OS
- ✓ **Responsive Design** for optimal display on all devices

Maps & location

Geographic location/coordinates, integration of GIS map systems

HybridForms Designer

Create custom form templates with Drag & Drop and Low Code

Excel Import/Export

Take over data from Excel in a structured way, export captured data

Workflow & interfaces

- ✓ **Stages workflow** with different authorizations
- ✓ **Import via automation** for pre-populated order forms
- ✓ **Interfaces** to central ERP and BI systems of the customer

On premises or Cloud

- ✓ **Operation** of HybridForms on your servers or your Azure Cloud
- ✓ **Licenses** – one-time purchase with maintenance or Software as a Service
- ✓ **Microsoft SQL & Windows Server** for central HybridForms Server

Kiosk Modus for Self Service

Protected mode with dynamic view & restricted features

Reports & BI analyses

Data export to Business Intelligence Tools for real-time analyses

HybridForms for Enterprise customers with distributed teams.

One license – unlimited applications.

Universal use.

HybridForms Prerequisites

HybridForms is a Software Suite for Enterprise Form Processes and Workflow with mobile Cross Platform and Cross Device Client App for iOS, Android and Windows. As well as a Progressive Web App (PWA) for desktop devices – without installation.

HybridForms Server uses Microsoft SQL and Windows Server. Operated completely on premises on your own servers or your Microsoft Azure Cloud.

The Software as a Service Solution (SaaS) is operated by icomedias (EU) or in Microsoft Azure.

HybridForms Integration Partner

icomedias links ergonomics, design and user experience with up-to-date technologies for successful mobile business form processes and has already been awarded **Microsoft Partner of the Year** twice.

We ♥ Solution Partners: icomedias as software producer does customer projects and business development together with experienced industry and solution partners.
